## Maintenance

STRETCH technical fabrics are glassfiber fabrics coated with polyurethane, which under most circumstances protects them from absorbing odours. STRETCH fabrics are hydrophobic and require little or no maintenance.

If cleaning is required, it is recommended to use the STRETCH Cleaner and the STRETCH cleaning glove or a non-abrasive soft cloth in a white color. The method to follow is:

1. Spray some STRETCH Cleaner on the glove and dab the area immediately.
2. If the stain persists, it is possible to repeat the operation several times.
3. Alternatively, other pH-neutral cleaning agents can be used with a soft white cloth, provided it has first been tested on a scrap piece or on a non-visible area of the fabric.

Under no circumstance should sodium hypochlorite based solutions (bleach) be used.
