

This product line features a selection of micro-perforation patterns—nearly invisible to the eye—designed for integration with any STRETCH PVC membrane. With a density of approximately 250,000 micro-perforations per square meter, these systems deliver outstanding sound absorption performance. They can be used with or without an acoustic backing and are customizable to meet specific frequency absorption targets. Trusted by acoustical consultants globally, this solution enhances interior acoustical comfort while maintaining a seamless visual appearance.

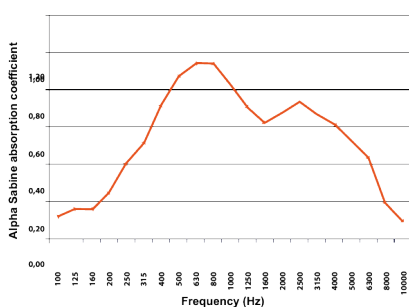

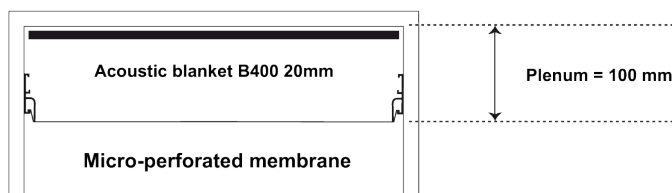

STRETCH/Micro-Perf **AlphaW = 0.65**
Double membrane **NRC = 0.55**

STRETCH/Micro-Perf **AlphaW = 0.45**
Single membrane **NRC = 0.45**

STRETCH/Micro-Perf **AlphaW = 0.75**
+ Blanket **NRC = 0.75**

STRETCH/Micro-Perf **AlphaW = 0.75**
+ Fiberglass **NRC = 0.90**
